

Loline

Dual Flush

Reliable

Quick Clean System

Durable and Dependable

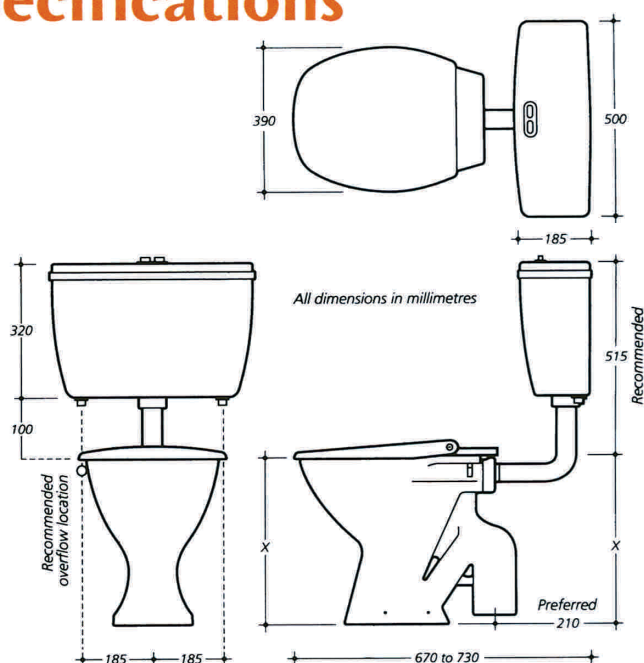

LoLine

Dux Loline cisterns bring sophistication into your bathroom at an affordable price. The Loline's contoured casing is available in a choice of white or almond ivory. It is sensibly designed with a flat top, making an excellent shelf for a favourite ornament or exotic plant to enliven your bathroom.

Dux Loline cisterns are built to the strictest quality standards in impact and chemical resistant, easy-care polypropylene.

They use few moving parts to ensure efficient and unquestionable reliability and simplicity of operation. The cisterns are supplied with a Qickee inlet valve matching the cistern colour. You have the choice of single or dual flush, activated by centre buttons, with an underside water feedpipe connection to allow you the flexibility in placing the cistern.

Specifications

Dux cisterns and seats comply with the New Zealand building code durability requirements of five years if installed and maintained in strict accordance with the instructions supplied with the product. The installer is responsible for the workmanship of the installation. The product is used for the flushing of W.C. pans in commercial and residential applications.
