2 SHELF PACK	A8243	A8241	A8245
3 SHELF PACK	A8364	A8362	A8366

Crest Showers Floating Glass Shower Shelf can be installed in any corner of a glass or tile wall. If two shelves are installed in the same corner, ideal shelf heights off the floor are 1200 & 1600mm. When installed in different corners, an ideal height is 1400mm off the floor.

When installing onto Seratone, Hardiglaze or Sim, apply masking tape to the liner then stick the stabiliser block to the masking tape. This makes the blocks easier to remove and protects the wall board surface.

We **DO NOT** recommend installing these on acrylic liners, due to adhesion difficulties. If you do wish to use on an acrylic surface, ensure the acrylic liner where you are mounting the footrest is roughened with sandpaper and extra time is taken before footrest is used.

IMPORTANT: Protect floor until adhesive has cured in case of the unlikely event thta shelf/shower is disturbed and shelf

PARTS LIST

INCLUDED

1. 1 x Adhesive
2. Stabiliser Blocks
3. Spatula

NEEDED

1. Masking Tape
2. 1 x Caulking Gun

INSTALLATION INSTRUCTIONS

1. PREPARATION
Clean area shelf is being adhered to ensuring it is free of any dust, soap scum, cleaners or any other substance.
2. STABILISER BLOCKS
Remove backing from stabiliser blocks and press firmly onto wall.

3. LEVEL
Place shelf in position and check for level. Optional - apply masking tape to shelf/wall.
4. ADHESIVE
Remove shelf and put a thin bead of adhesive down both edges of shelf.
5. PLACEMENT
Carefully place shelf on stabiliser blocks and gently push into corner. Check for level.

6. CLEANING
Clean up adhesive with spatula. Remove masking take.

7. CURING
After 24-48 hours remove stabliser blocks.
