

Microlene Cartridge Design

The **5-Stage, 1-micron water filtration process** reduces bad taste and odour, chemicals (such as chlorine), sediment and Trihalomethane (THM's) whilst leaving all vital minerals in the water supply. It protects and removes up to **99.9% of harmful cysts** like Giardia and Cryptosporidium, and also incorporates water softening beads for treating scale and hard water. What's left is clean and safe drinking water for the whole family to enjoy.

The cartridge design provides toolless installation and replacement. Simply turn off the cold water supply, drain the water from the line (by turning on the filter tap), then twist and remove, or insert and twist to install.

Designed to purify up to 65,000 litres of water.
Recommended replacement every 6 months.

Other indicators your cartridge needs replacing are if flow is significantly reduced or, taste and odour is detected while drinking the water.

What's in your water supply?

Most water supplies contain dissolved minerals such as chlorine and aluminium, as well as sediment that can leave a residual smell and taste in the water.

In municipal water supply, there can also be Trihalomethane (THMs) present. THMs form as a result of water having been treated with chlorine where levels of organic matter were present and will be harmful if consumed.

If you get your water from other than municipal supply, your water may also contain parasitic cysts such as Giardia and Cryptosporidium.

MICROLENE UNDER BENCH HIGH FLOW FILTRATION SYSTEMS

Ideal for the home or workplace, Microlene Under Bench High Flow Filtration Systems provide clean, safe water, free from taste and odour, sediment, trihalomethanes (THM's) and parasitic cysts like Cryptosporidium and Giardia.

3 WAY MIXER TAP & UNDER BENCH FILTRATION SYSTEMS

Model No.s:
 MTC-HF1M Chrome Finish Mixer
 MTCM-HF1M Chrome Matte/
 Brushed Finish Mixer

Typically installed in new builds or where an existing tap is being replaced along with filtration, providing hot, cold and filtered water on demand, with no mixing of filtered and unfiltered water.

Included:

- Attractive Mixer Tap available in two finishes
- 1 Micron Cartridge for fine filtration, providing clean tasting drinking water
- All plumbing connections required for a standard installation

UNDER BENCH HIGH FLOW FILTRATION SYSTEM

Model No.:
 HF1M

Typically installed where there is an existing tap, filtering all cold water supplied through the tap. Mount horizontally or vertically – no shelf cutouts required.

Included:

- 1 Micron Cartridge for fine filtration, providing clean tasting drinking water
- All plumbing connections required for a standard installation

MTCM-HF1M standard installation pictured

- Quick Toolless Filter Changeover
- 1 Micron Filter
- Includes Installation Fittings

SYSTEM SPECIFICATIONS		
Maximum Flow		9.5 lpm
Maximum Temperature	- Cartridge - 3 Way Mixer	0 - 38°C 4 - 90°C
Pressure Rating		200 - 680kPa
Micron Rating		1
Cartridge Connection		Twist
Cartridge Capacity		65,000 litres
Cartridge Replacement		6 months
All Connections		1/2" BSP
Replacement Cartridge		HF1M-R
Certification		
3 Way Mixer		WELS and WaterMark
Smart T, 1/4" Tube, Cartridge & Mounting Head, 1/4" to 1/2" Connectors		AS/NZS 4020:2018
All other components/fittings that touch water		WaterMark
Space required for mounting		
Vertical or Horizontal		500mm H x 215mm W
Hole Size for Mixer (MTC-HF1M/MTCM-HF1M)		33 - 35mm
