Installation Notes:

- Water supply pressure range: 140 kPa - 500 kPa.
- Can be installed with a P-trap using a straight connector.
- The in wall cistern is designed to be fixed to 600mm centre studs using wood screws (not supplied)
- In wall cistern support brackets (supplied) are fixed to the studs first, then the in wall cistern (supplied) is fixed to the brackets using bolts.
- The flush button panel (supplied) can be cut so that it sits flush with the wall.
