IMPORTANT NOTE: Wall materials vary. The fixing kit supplied is suited for use with a solid wall. For timber framed walls, please ensure the accessory is fixed to a stud/noggin behind the wall. A suitable hollow wall fixing should be used if a stud/noggin is not available.

Trim Ring

Wall Mounting Plate

Mounting Screws

Accessory

Grub Screw

Hex Key

Installation:

Step 1

- Position your accessory in the desired mounting location. Ensure the accessory is level and mark the location by scribing a circle around the trim ring(s).

- Remove the trim ring(s) and wall mounting plate(s) from the accessory by loosening the grub screw(s) underneath.
Step 2

- Using the trim ring as guide, mark the location of the screw holes. Ensure the holes are aligned vertically.

- Drill mounting holes - Note: Drill type and size will depend on wall construction. A 6mm hole is recommended for the wall plugs supplied.

- Insert the wall plugs into the drilled holes if required. Use a mallet to gently tap the plugs in until flush with the wall surface if necessary.

Step 3

- Insert the wall mounting plate into the trim ring, and screw both to the wall. Check that the trim ring is flush against the wall.

Step 4

- Push the accessory onto the trim ring(s) and check the accessory is level. Loosen the screws and adjust the mounting plate position if required.

- Tighten grub screw(s) firmly with hex key provided.
